Continuation of 5. does NOT place the application in condition for allowance because: Applicant's argument is not persuasive. Applicant's main argument is that the cited prior art reference do not teach that the interconnection has "its first exposed end facing outside the molded body, the first exposed end and a first side of the molded body being on the same first plane" and likewise with the second exposed end. However, the Chun reference clearly teaches this limitation in fig., ref. 203, 205. Furthermore, the Schenfeld reference discloses this limitation as well in fig. 5 and 6.
